## Systems Y14

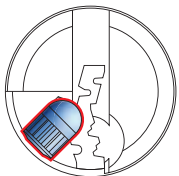

Locking Systems with Precision

### Internal Key Stop

The special key stop offers extra copy protection technology.

If the key stop groove does not correspond with the stop pin the key will not go in the lock far enough for the key to work.

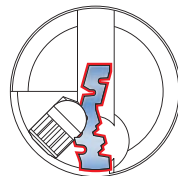

Stop pin

### Precision Angled Key Profile

The angled key profile offers effective resistance to picking.

The angled profile offers much higher key stability.

Angled "V" profile

### General Benefits

Complex locking through a 14 mm core offers greater system flexibility.

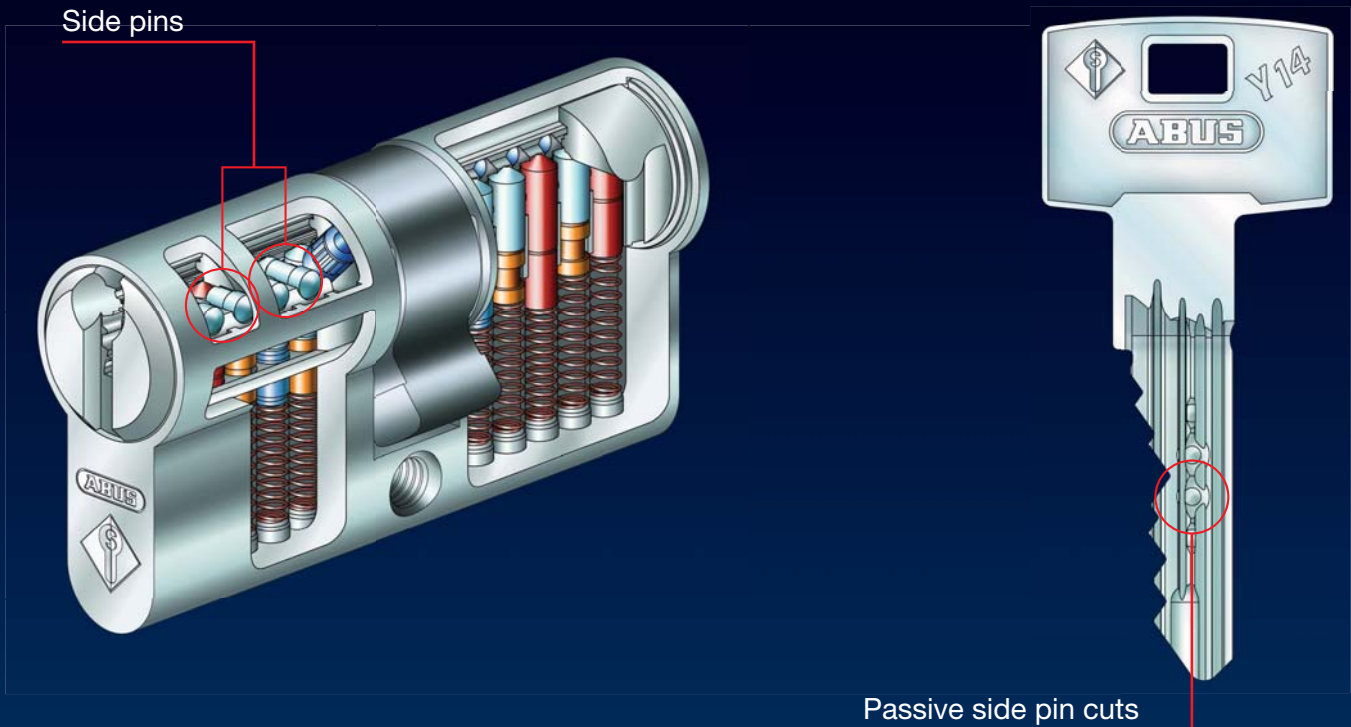

Legal protection (Patent) gives "the good feeling of security".

Six (6) to ten (10) locking elements.

Durable key design through nickle silver keys.

# Systems XY14

Side passive pins leads to higher locking security.

## Ideal for higher security requirements

XY14 offers a higher level of security with the use of passive side pins. Increasing the locking security and enhancing the master key possibilities.

The addition of XY14 into existing Y14 systems gives future flexibility. Alternatively, a system can be entirely XY14. Allowing for larger systems with complex security needs right from the start.

## Improved security

The additional locking row makes manipulating the lock even more difficult

Unauthorised copying of dimple cuts is extremely difficult.

Up to 10 pins per cylinder provide optimum protection against side attack.

Drilling protection from hard steel pins in cylinders.

## Special numbering

For individual identification of both key and lock stamping can be used throughout any ABUS 14 system. Ensuring ease of service.

# Product Range

More than 30 different standard types of cylinders in up to 100 dimensions, special shapes, 6 standard colours and many specialised features.

## Exemplary References

A great job creates trust.

Quality produces success and references.

On this foundation we have gained not just extensive experience when it comes to making high security locking systems that are acknowledged and tested internationally.

Gain the confidence and trust in your locking systems to keep your interests safe.

## Key Systems With Profile

From the central key system to the grand master system, ABUS 14 products meet the highest of demands. Our customers are international, so is our product range.

To any specific requirement for your key system, we provide solutions.

## References Create Trust

The 80,00 sq. foot Kaiserslautern Military Community Center (KMCC) has been secured with an **ABUS 14** locking system.

### Quality creates references, references create trust!

Confidence with over 85 years experience of ABUS security products.

### International

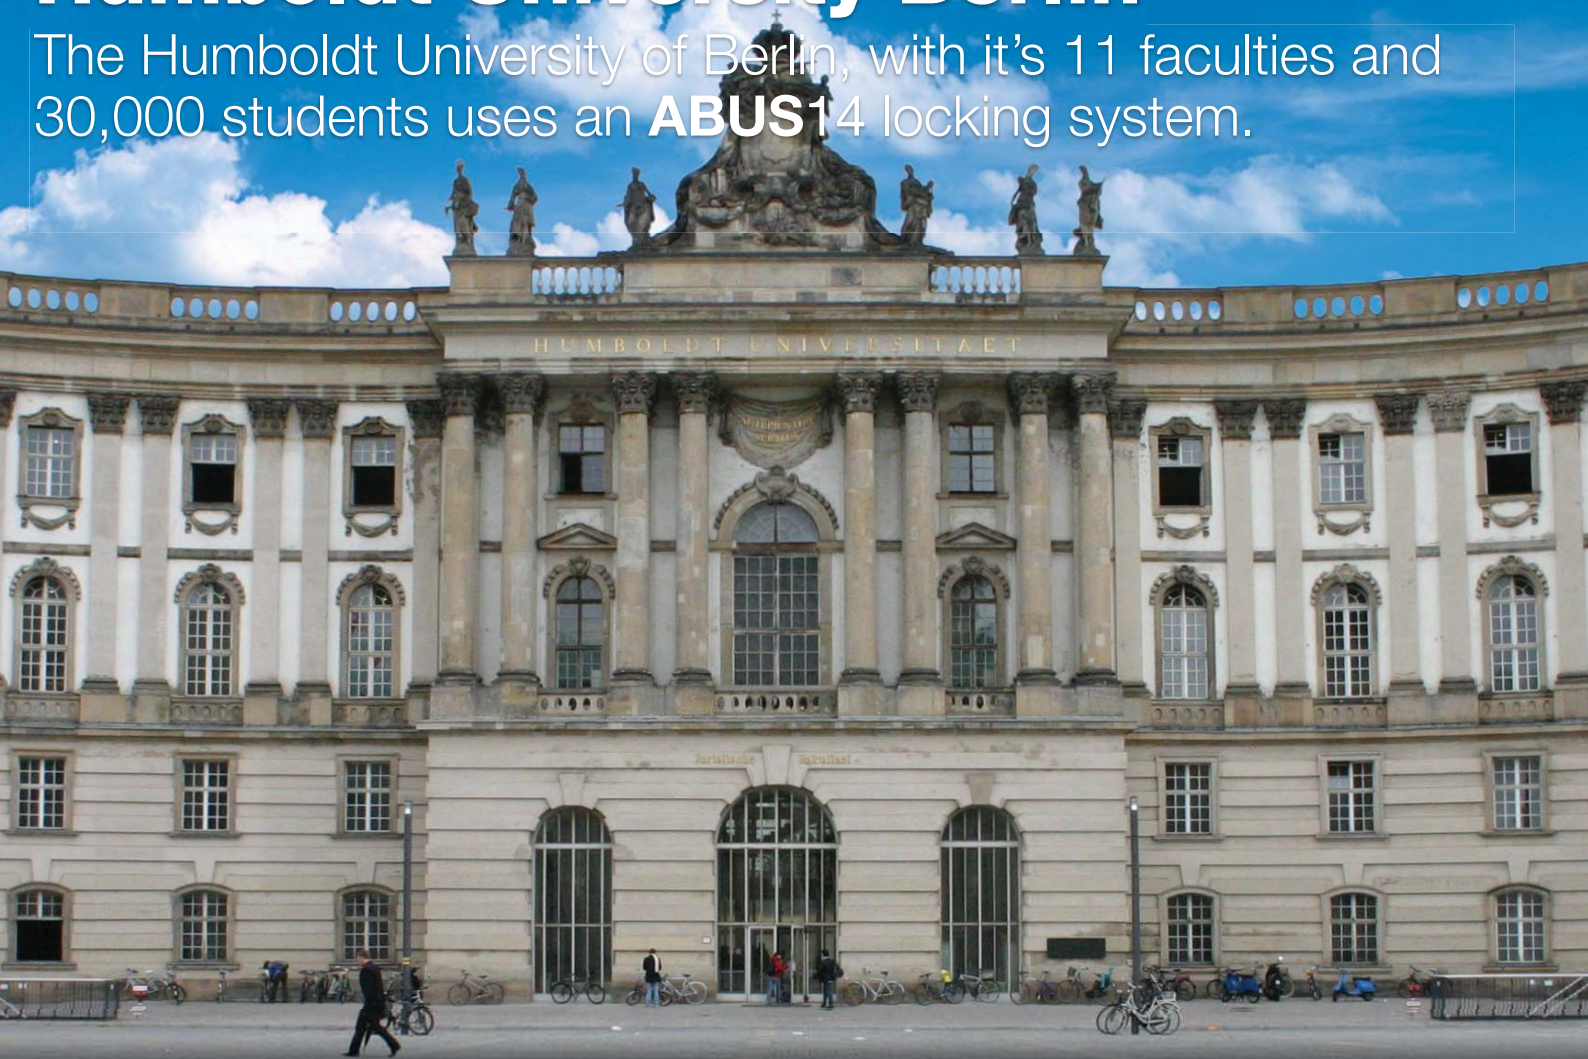

New Parliament - London  
 New Wembley Stadium - London  
 Ferrari Plant - Maranello  
 National Bank of Dubai - Dubai  
 Golden Pyramids Plaza - Cairo
